SUMMARY

QA engineer with **4.8 years of manual testing experience**, primarily **functional testing of enterprise applications**. Designed test strategies, executed regression and system tests, and ensured compliance with business requirements across payment, gaming, retail, and education domains. Strong background in fast-paced Agile delivery.

CORE SKILLS

- **Functional Testing:** Enterprise applications · functional · regression · system · UAT
- **Manual Testing:** Functional · Regression · Sanity · Smoke · Integration · UAT
- **Test Strategy:** Test planning · Test case design · Requirements analysis
- **Test Mgmt:** Jira · Local Test Case Generator (Jira workflow)
- **API & DB:** Rest Assured · Postman · SQL validation
- **CI/CD & DevOps:** Jenkins · GitHub Actions · Docker · Git
- **Methodologies:** Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Test Engineer / Senior QA | Chetu India Pvt. Ltd.

Jun 2021 – Oct 2023

- Designed test strategies and led test planning and execution for web/mobile enterprise modules.
- Executed regression and system tests; authored 500+ test cases and maintained regression packs.
- Ensured compliance with business requirements through traceability from requirements to test cases; increased early defect detection by 25%.
- Worked in fast-paced environments — coordinated scrum ceremonies and delivered on sprint cadence.

Testing Engineer | Coracle Infotech India Pvt. Ltd.

Feb 2019 – Jun 2021

- Executed functional, integration, system, regression, and UAT cycles for enterprise payment, gaming, and retail applications.
- Analysed product requirements to design and execute test cases; tracked defects in Jira and improved defect resolution SLA from 72 hrs → 48 hrs.
- Validated payment transactions and MPOS flows; analysed middleware logs to reduce payment failures by 20%.

CAREER BREAK & UPSKILLING

Career Break & Upskilling

Oct 2023 – Present

- Playwright: built automated web test suites; converted 100 manual scenarios to automated checks.
- CI/CD: integrated test execution into Jenkins and GitHub Actions for PR gating and nightly regression.

- Local Test Case Generator (Jira): designed a workflow to auto-generate structured test cases from Jira tickets, reducing test design time by 50%.
- AI Prompting for QA: created prompts/workflows to generate test ideas and edge cases, accelerating test design by 40%.

PROJECTS & DOMAIN HIGHLIGHTS

- Enterprise applications: full lifecycle testing for Education ERP — student, faculty, and staff modules.
- Payment & Gaming: end-to-end testing across POS, Management, Player, and Game portals.
- MS Dynamics 365 FO: tested Retail & Commerce payment connector and MPOS integrations.
- Local Test Case Generator (Jira-based): auto-generated structured test cases from Jira descriptions; reduced manual test design time by 50%.

EDUCATION & CERTIFICATIONS

- **M.Tech:** GGSIPU — 2012
- **B.Tech:** UPTU — 2009
- **Claude 101 Certified:** AI-assisted QA workflows
