SUMMARY

QA engineer with **4.8 years of experience** spanning **manual and automation testing** of enterprise software. Designed test cases, executed regression suites, and reported defects while owning end-to-end quality for web/mobile and enterprise modules. **2 years of automation experience** with Playwright, Selenium BDD, and CI/CD integration.

CORE SKILLS

- **Manual Testing:** Functional · Regression · Sanity · Smoke · Integration · UAT
- **Automation:** Playwright · Selenium (Java) · Cucumber BDD
- **Enterprise Software:** Payment · Gaming · Retail · Education ERP
- **API & DB:** Rest Assured · Postman · SQL validation
- **CI/CD & DevOps:** Jenkins · GitHub Actions · Docker · Git
- **Performance:** JMeter
- **Test Mgmt:** Jira · Local Test Case Generator (Jira workflow)
- **Methodologies:** Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Test Engineer / Senior QA | Chetu India Pvt. Ltd.

Jun 2021 – Oct 2023

- Designed test cases and led test planning and execution for web/mobile enterprise modules; authored 500+ test cases.
- Executed regression suites and reported defects; increased early defect detection by 25%.
- Performed manual and automation testing — automated 200 test cases with Selenium BDD and Playwright, reducing manual regression effort by 30%.
- Integrated automated suites into Jenkins / GitHub Actions, cutting release verification time from 3 days → 1 day.
- Collaborated with QA teams in scrum ceremonies and mentored junior testers (onboarded 4).

Testing Engineer | Coracle Infotech India Pvt. Ltd.

Feb 2019 – Jun 2021

- Executed functional, integration, system, regression, and UAT cycles for enterprise payment, gaming, and retail software.
- Prepared and executed test cases; tracked defects in Jira and improved defect resolution SLA from 72 hrs → 48 hrs.
- Validated payment transactions and MPOS flows; analysed middleware logs to reduce payment failures by 20%.

CAREER BREAK & UPSKILLING

Career Break & Upskilling

Oct 2023 – Present

- Playwright: built automated web test suites; converted 100 manual scenarios to automated checks.

- CI/CD: integrated test execution into Jenkins and GitHub Actions for PR gating and nightly regression.
- Local Test Case Generator (Jira): designed a workflow to auto-generate structured test cases from Jira tickets, reducing test design time by 50%.
- AI Prompting for QA: created prompts/workflows to generate test ideas and edge cases, accelerating test design by 40%.

PROJECTS & DOMAIN HIGHLIGHTS

- Local Test Case Generator (Jira-based): auto-generated structured test cases from Jira descriptions; reduced manual test design time by 50%.
- Payment & Gaming: end-to-end testing across POS, Management, Player, and Game portals.
- Education ERP: full lifecycle testing for student, faculty, and staff modules.
- MS Dynamics 365 FO: tested Retail & Commerce payment connector and MPOS integrations.

EDUCATION & CERTIFICATIONS

- **M.Tech:** GGSIPU — 2012
- **B.Tech:** UPTU — 2009
- **Claude 101 Certified:** AI-assisted QA workflows
