SUMMARY

QA engineer with **4.8 years of experience** including **payment solutions** testing. Performed functional testing, defect reporting, and regression testing for payment transactions (Credit Card, PayPal, external gift cards) and MPOS flows. Strong **knowledge of payment systems** — validated payment connectors, middleware logs, and end-to-end transaction flows.

CORE SKILLS

- **Payment Systems:** Credit Card · PayPal · Gift Cards · MPOS · Payment connectors
- **Manual Testing:** Functional · Regression · Sanity · Smoke · Integration · UAT
- **API & DB:** Rest Assured · Postman · SQL validation
- **Test Mgmt:** Jira · Local Test Case Generator (Jira workflow)
- **Automation:** Playwright · Selenium (Java) · Cucumber BDD
- **CI/CD & DevOps:** Jenkins · GitHub Actions · Docker · Git
- **Methodologies:** Agile / Scrum

PROFESSIONAL EXPERIENCE

Testing Engineer | Coracle Infotech India Pvt. Ltd.

Feb 2019 – Jun 2021

- Performed QA testing for payment solutions — validated payment transactions (Credit Card, PayPal, external gift cards) and MPOS flows.
- Executed functional testing and defect reporting; tracked defects in Jira and improved defect resolution SLA from 72 hrs → 48 hrs.
- Performed regression testing across payment, gaming, and retail domains.
- Analysed middleware logs to reduce payment failures by 20%.

Software Test Engineer / Senior QA | Chetu India Pvt. Ltd.

Jun 2021 – Oct 2023

- Led test planning and execution for web/mobile modules; authored 500+ test cases.
- Executed functional and regression cycles; increased early defect detection by 25%.
- Built API automation with Rest Assured and validated backend flows with SQL.

CAREER BREAK & UPSKILLING

Career Break & Upskilling

Oct 2023 – Present

- Playwright: built automated web test suites; converted 100 manual scenarios to automated checks.
- CI/CD: integrated test execution into Jenkins and GitHub Actions for PR gating and nightly regression.

- Local Test Case Generator (Jira): designed a workflow to auto-generate structured test cases from Jira tickets, reducing test design time by 50%.
- AI Prompting for QA: created prompts/workflows to generate test ideas and edge cases, accelerating test design by 40%.

PROJECTS & DOMAIN HIGHLIGHTS

- Payment: end-to-end testing of payment connector and MPOS integrations on MS Dynamics 365 FO Retail & Commerce.
- Payment & Gaming: end-to-end testing across POS, Management, Player, and Game portals; validated transaction flows.
- Local Test Case Generator (Jira-based): auto-generated structured test cases from Jira descriptions.

EDUCATION & CERTIFICATIONS

- **M.Tech:** GGSIPU — 2012
- **B.Tech:** UPTU — 2009
- **Claude 101 Certified:** AI-assisted QA workflows
