SUMMARY

QA engineer with **4.8 years of experience** executing **manual and automation testing**, reporting defects, and collaborating with developers. Built and maintained automated suites with Playwright and Selenium BDD; executed functional, regression, and UAT cycles across payment, gaming, retail, and education domains.

CORE SKILLS

- **Manual Testing:** Functional · Regression · Sanity · Smoke · Integration · UAT
- **Automation:** Playwright · Selenium (Java) · Cucumber BDD
- **Defect Reporting:** Jira · Defect lifecycle · Triage with developers
- **API & DB:** Rest Assured · Postman · SQL validation
- **CI/CD & DevOps:** Jenkins · GitHub Actions · Docker · Git
- **Test Mgmt:** Jira · Local Test Case Generator (Jira workflow)
- **Methodologies:** Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Test Engineer / Senior QA | Chetu India Pvt. Ltd.

Jun 2021 – Oct 2023

- Executed manual and automation testing — automated 200 test cases with Selenium BDD and Playwright, reducing manual regression effort by 30%.
- Reported defects and collaborated with developers on triage; increased early defect detection by 25%.
- Integrated automated suites into Jenkins / GitHub Actions, cutting release verification time from 3 days → 1 day.
- Mentored junior testers (onboarded 4).

Testing Engineer | Coracle Infotech India Pvt. Ltd.

Feb 2019 – Jun 2021

- Executed manual testing — functional, integration, system, regression, and UAT cycles for payment, gaming, and retail applications.
- Reported defects and tracked them in Jira; improved defect resolution SLA from 72 hrs → 48 hrs.
- Collaborated with developers and analysed middleware logs to reduce payment failures by 20%.

CAREER BREAK & UPSKILLING

Career Break & Upskilling

Oct 2023 – Present

- Playwright: built automated web test suites; converted 100 manual scenarios to automated checks.
- CI/CD: integrated test execution into Jenkins and GitHub Actions for PR gating and nightly regression.
- Local Test Case Generator (Jira): designed a workflow to auto-generate structured test cases from Jira tickets, reducing test design time by 50%.

- AI Prompting for QA: created prompts/workflows to generate test ideas and edge cases, accelerating test design by 40%.

PROJECTS & DOMAIN HIGHLIGHTS

- Payment & Gaming: end-to-end testing across POS, Management, Player, and Game portals.
- Education ERP: full lifecycle testing for student, faculty, and staff modules.
- MS Dynamics 365 FO: tested Retail & Commerce payment connector and MPOS integrations.

EDUCATION & CERTIFICATIONS

- **M.Tech:** GGSIPU — 2012
- **B.Tech:** UPTU — 2009
- **Claude 101 Certified:** AI-assisted QA workflows
