

MAMTA SINGH SENGAR

QE SOFTWARE ENGINEER · TEST AUTOMATION FRAMEWORKS & PRODUCT QUALITY

Noida, India • mamtasingh2326@gmail.com • +91 95199 60636
Immediate availability • linkedin.com/in/mamta-sengar

SUMMARY

Quality engineer with **4.8 years of experience**, including **2 years** developing and maintaining test automation frameworks. Built and maintained Selenium BDD (Cucumber) and Playwright frameworks, integrated them into CI/CD, and ensured **product quality** across web/mobile and enterprise applications.

CORE SKILLS

- **Test Automation Frameworks:** Selenium (Java) · Playwright · Cucumber BDD · Framework maintenance
- **Product Quality:** Functional · Regression · Sanity · Smoke · Integration · UAT
- **API & DB:** Rest Assured · Postman · SQL validation
- **CI/CD & DevOps:** Jenkins · GitHub Actions · Docker · Git
- **Performance:** JMeter
- **Test Mgmt:** Jira · Local Test Case Generator (Jira workflow)
- **Methodologies:** Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Test Engineer / Senior QA | Chetu India Pvt. Ltd.

Jun 2021 – Oct 2023

- Developed and maintained test automation frameworks using Selenium BDD (Cucumber) and Playwright.
- Ensured product quality — automated 200 test cases, reducing manual regression effort by 30%.
- Maintained framework stability across CI/CD — integrated into Jenkins / GitHub Actions, cutting release verification time from 3 days → 1 day.
- Built API automation with Rest Assured and validated backend flows with SQL.

Testing Engineer | Coracle Infotech India Pvt. Ltd.

Feb 2019 – Jun 2021

- Executed functional, integration, system, regression, and UAT cycles for payment, gaming, and retail domains.
- Tracked defects in Jira and improved defect resolution SLA from 72 hrs → 48 hrs.
- Validated payment transactions and MPOS flows; analysed middleware logs to reduce payment failures by 20%.

CAREER BREAK & UPSKILLING

Career Break & Upskilling

Oct 2023 – Present

- Playwright: built automated web test suites; converted 100 manual scenarios to automated checks.
- CI/CD: integrated test execution into Jenkins and GitHub Actions for PR gating and nightly regression.
- Local Test Case Generator (Jira): designed a workflow to auto-generate structured test cases from Jira tickets, reducing test design time by 50%.

- AI Prompting for QA: created prompts/workflows to generate test ideas and edge cases, accelerating test design by 40%.

PROJECTS & DOMAIN HIGHLIGHTS

- Local Test Case Generator (Jira-based): designed and delivered an automation workflow for structured test cases.
- Payment & Gaming: end-to-end testing across POS, Management, Player, and Game portals.
- Education ERP: full lifecycle testing for student, faculty, and staff modules.

EDUCATION & CERTIFICATIONS

- **M.Tech:** GGSIPU — 2012
- **B.Tech:** UPTU — 2009
- **Claude 101 Certified:** AI-assisted QA workflows
