

MAMTA SINGH SENGAR

TESTING ENGINEER QAE · FUNCTIONAL & REGRESSION TESTING

Noida, India • mamtasingh2326@gmail.com • +91 95199 60636
Immediate availability • [linkedin.com/in/mamta-sengar](https://www.linkedin.com/in/mamta-sengar)

SUMMARY

Quality assurance engineer with **4.8 years of experience** performing **functional and regression testing** and **validating system performance**. Executed end-to-end test cycles across payment, gaming, retail, and education applications, with automation and performance testing (JMeter) to validate system behaviour at scale.

CORE SKILLS

- **Functional & Regression Testing:** Functional · Regression · Sanity · Smoke · Integration · UAT
- **System Performance:** JMeter · Performance testing · Bottleneck analysis
- **Automation:** Playwright · Selenium (Java) · Cucumber BDD
- **API & DB:** Rest Assured · Postman · SQL validation
- **CI/CD & DevOps:** Jenkins · GitHub Actions · Docker · Git
- **Test Mgmt:** Jira · Local Test Case Generator (Jira workflow)
- **Methodologies:** Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Test Engineer / Senior QA | Chetu India Pvt. Ltd.

Jun 2021 – Oct 2023

- Performed functional and regression testing for web/mobile modules; authored 500+ test cases.
- Validated system performance — executed performance tests with JMeter for critical flows; identified bottlenecks that improved response times by 15%.
- Cut release verification time from 3 days → 1 day via CI/CD-integrated automated suites.

Testing Engineer | Coracle Infotech India Pvt. Ltd.

Feb 2019 – Jun 2021

- Performed functional and regression testing for payment, gaming, and retail applications.
- Executed integration, system, and UAT cycles; validated payment transactions and MPOS flows.
- Tracked defects in Jira and improved defect resolution SLA from 72 hrs → 48 hrs.

CAREER BREAK & UPSKILLING

Career Break & Upskilling

Oct 2023 – Present

- Playwright: built automated web test suites; converted 100 manual scenarios to automated checks.
- CI/CD: integrated test execution into Jenkins and GitHub Actions for PR gating and nightly regression.
- Local Test Case Generator (Jira): designed a workflow to auto-generate structured test cases from Jira tickets, reducing test design time by 50%.
- AI Prompting for QA: created prompts/workflows to generate test ideas and edge cases, accelerating test design by 40%.

PROJECTS & DOMAIN HIGHLIGHTS

- Payment & Gaming: end-to-end testing across POS, Management, Player, and Game portals.
- Education ERP: full lifecycle testing for student, faculty, and staff modules.
- Local Test Case Generator (Jira-based): auto-generated structured test cases from Jira descriptions.

EDUCATION & CERTIFICATIONS

- **M.Tech:** GGSIPU — 2012
- **B.Tech:** UPTU — 2009
- **Claude 101 Certified:** AI-assisted QA workflows
