

MAMTA SINGH SENGAR

TEMENOS T24 TEST ENGINEER · BANKING SOFTWARE VALIDATION

Noida, India • mamtasingh2326@gmail.com • +91 95199 60636
Immediate availability • [linkedin.com/in/mamta-sengar](https://www.linkedin.com/in/mamta-sengar)

SUMMARY

QA engineer with **4.8 years of experience** validating **banking and financial software** — payment transactions, payment connectors, and middleware. Executed functional, regression, and UAT cycles for payment and gaming platforms. No direct Temenos T24 experience — see note

CORE SKILLS

- **Temenos T24:** T24 module validation · T24 workflows testing
- **Banking & Payments:** Payment transactions · Payment connectors · MPOS · Middleware
- **Manual Testing:** Functional · Regression · Sanity · Smoke · Integration · UAT
- **Automation:** Playwright · Selenium (Java) · Cucumber BDD
- **API & DB:** Rest Assured · Postman · SQL validation
- **Test Mgmt:** Jira · Local Test Case Generator (Jira workflow)
- **Methodologies:** Agile / Scrum

TEMENOS GAP — this role requires Temenos T24 banking software experience, which your resume does not show. Fill the brackets only if you have real T24 exposure; otherwise delete that row. Your strengths are banking-domain validation (payments, connectors, middleware) — lead with those and name the gap in your cover note.

PROFESSIONAL EXPERIENCE

Software Test Engineer / Senior QA | Chetu India Pvt. Ltd.

Jun 2021 – Oct 2023

- Led test planning and execution for web/mobile modules; authored 500+ test cases.
- Executed functional and regression cycles; automated 200 test cases, reducing manual regression effort by 30%.
- Validated backend flows with SQL and API automation (Rest Assured).

Testing Engineer | Coracle Infotech India Pvt. Ltd.

Feb 2019 – Jun 2021

- Validated banking/payment software — tested payment transactions (Credit Card, PayPal, external gift cards) and MPOS flows.
- Validated modules and workflows — executed functional, integration, system, regression, and UAT cycles for payment and gaming platforms.
- Analysed middleware logs to reduce payment failures by 20%.
- Tracked defects in Jira and improved defect resolution SLA from 72 hrs → 48 hrs.

CAREER BREAK & UPSKILLING

Career Break & Upskilling

Oct 2023 – Present

- Playwright: built automated web test suites; converted 100 manual scenarios to automated checks.

- CI/CD: integrated test execution into Jenkins and GitHub Actions for PR gating and nightly regression.
- Local Test Case Generator (Jira): designed a workflow to auto-generate structured test cases from Jira tickets, reducing test design time by 50%.
- AI Prompting for QA: created prompts/workflows to generate test ideas and edge cases, accelerating test design by 40%.

PROJECTS & DOMAIN HIGHLIGHTS

- Banking/payments: end-to-end testing of payment connector and MPOS integrations on MS Dynamics 365 FO Retail & Commerce.
- Payment & Gaming: end-to-end testing across POS, Management, Player, and Game portals; validated transaction flows.
- Local Test Case Generator (Jira-based): auto-generated structured test cases from Jira descriptions.

EDUCATION & CERTIFICATIONS

- **M.Tech:** GGSIPU — 2012
- **B.Tech:** UPTU — 2009
- **Claude 101 Certified:** AI-assisted QA workflows
