

Mamta Singh Sengar Email: mamtasingh2326@gmail.com

| **Phone:** (+91) 95199 60636 |

Location: Noida, India

Total experience: 4 Years 8 Months — *Manual QA (4.8 yrs) + Automation (2 yrs)*

PROFESSIONAL SUMMARY

QA professional with **4.8 years in Manual Testing** and **2 years in Automation**. Proven record improving release quality and speed through automation and CI/CD integration. Upskilled during a career break (13 Oct 2023 – Present) in **Playwright, CI/CD pipelines, AI prompting for QA**, and a **Jira-based local test case generator**. **Clause 101 certified**.

CORE SKILLS

Manual Testing: Functional, Regression, Sanity, Smoke, Integration, UAT

Automation: Playwright; Selenium (Java) with BDD Cucumber

API & DB: Rest Assured; Postman; SQL validation

CI/CD & DevOps: Jenkins; GitHub Actions; Docker; Git

Performance: JMeter

Test Mgmt: Jira; Local Test Case Generator (Jira workflow)

Methodologies: Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Test Engineer / Senior QA:

Chetu India Pvt. Ltd. Jun 2021 – Oct 2023

- Led test planning and execution for web/mobile modules.
- Authored **500+** test cases and maintained regression packs.
- Implemented UI automation using **Selenium BDD (Cucumber)** and **Playwright**.
- **Automated 200 test cases**, reducing manual regression effort by **30%**.

- Integrated automated suites into **Jenkins / GitHub Actions** to run on PRs and nightly builds, cutting release verification time from **3 days → 1 day**.
- Built API automation with **Rest Assured** and validated backend flows with SQL.
- Increased early defect detection by **25%**.
- Executed performance tests with **JMeter** for critical flows;
- Identified bottlenecks that improved response times by **15%**.
- Coordinated scrum ceremonies, conducted demo calls, and mentored junior testers (onboarded **4** testers).

Testing Engineer:

Coracle Infotech India Pvt. Ltd. Feb 2019 – Jun 2021

- Executed functional, integration, system, regression, and UAT cycles for payment, gaming, and retail domains.
- Validated payment transactions (Credit Card, PayPal, external gift cards) and MPOS flows;
- Analysed middleware logs to reduce payment failures by **20%**.
- Prepared and executed test cases; tracked defects in **Jira** and improved defect resolution SLA from **72 hrs → 48 hrs**.
- Supported Dynamics 365 FO retail/commerce configurations and MPOS integrations, reducing setup errors by **30%**.

CAREER BREAK & UPSKILLING (13 Oct 2023 – Present)

- **Playwright:** Built automated web test suites; converted **100** manual scenarios to automated checks.
- **CI/CD:** Integrated test execution into Jenkins and GitHub Actions for PR gating and nightly regression.
- **AI Prompting for QA:** Created prompts/workflows to generate test ideas and edge cases, accelerating test design by **40%**.
- **Local Test Case Generator (Jira):** Designed a workflow to auto-generate structured test cases from Jira tickets, reducing test design time by **50%**.
- **Certification:** Claude 101.

PROJECTS & DOMAIN HIGHLIGHTS

- **Local Test Case Generator (Jira-based):** Auto-generated structured test cases from Jira descriptions; reduced manual test design time by **50%**.
- **Payment & Gaming:** End-to-end testing across POS, Management, Player, and Game portals; validated transaction flows and game payout logic.
- **MS Dynamics 365 FO:** Tested Retail & Commerce payment connector and MPOS integrations.
- **Education ERP:** Full lifecycle testing for student, faculty, and staff modules.

EDUCATION & CERTIFICATIONS

M.Tech, GGSIPU — 2012

B.Tech, UPTU — 2009

Claude 101 Certified

LANGUAGES & AVAILABILITY

Languages: Hindi, English

Availability: Immediate

How to finalise metrics (quick guidance)

- **Test cases authored/automated:** count total test cases you wrote and how many you automated. Replace **500+**, **200+** with real counts.
- **Regression effort reduction:** use time saved per release or number of manual hours eliminated; replace **30%** with your measured percent.
- **Defect detection/production defect reduction:** use pre/post metrics (e.g., defects found in pre-prod vs production) to compute per cent change.
- **Release verification time:** use average time before and after automation (e.g., 72 hrs → 24 hrs).
- **Team/mentoring metrics:** number of people onboarded or trained.
